

MK.IV

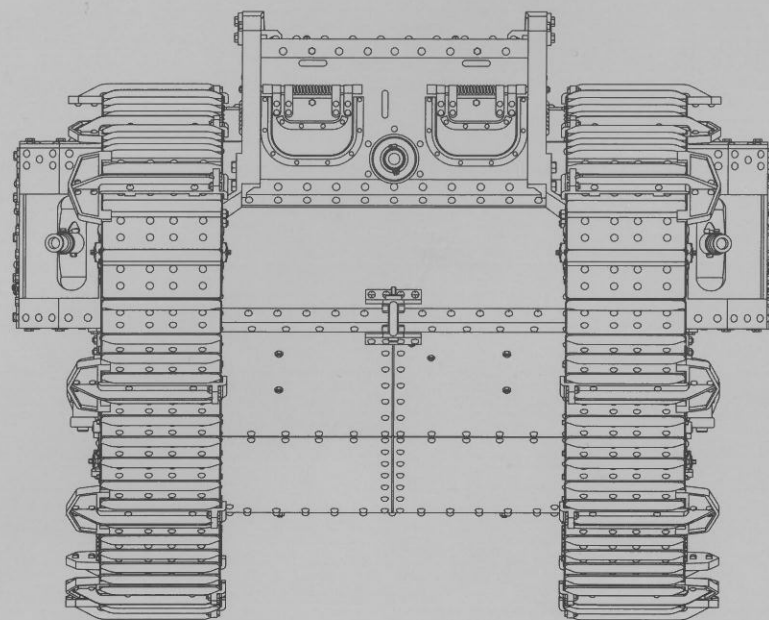

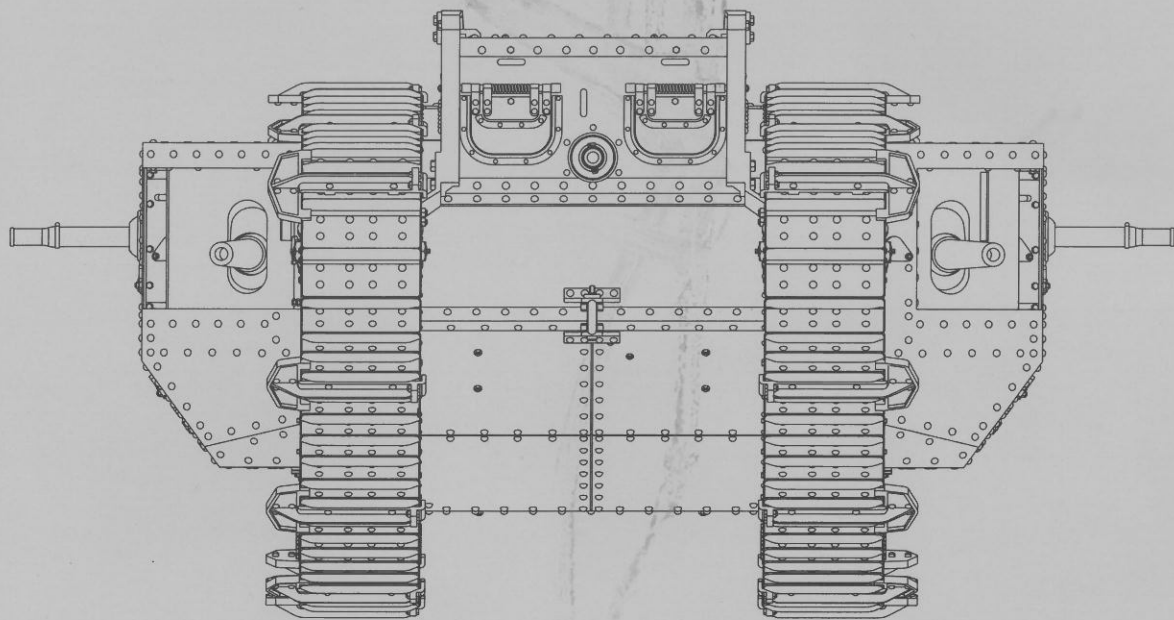

“Male” “Female”

WWI HEAVY BATTLE TANK

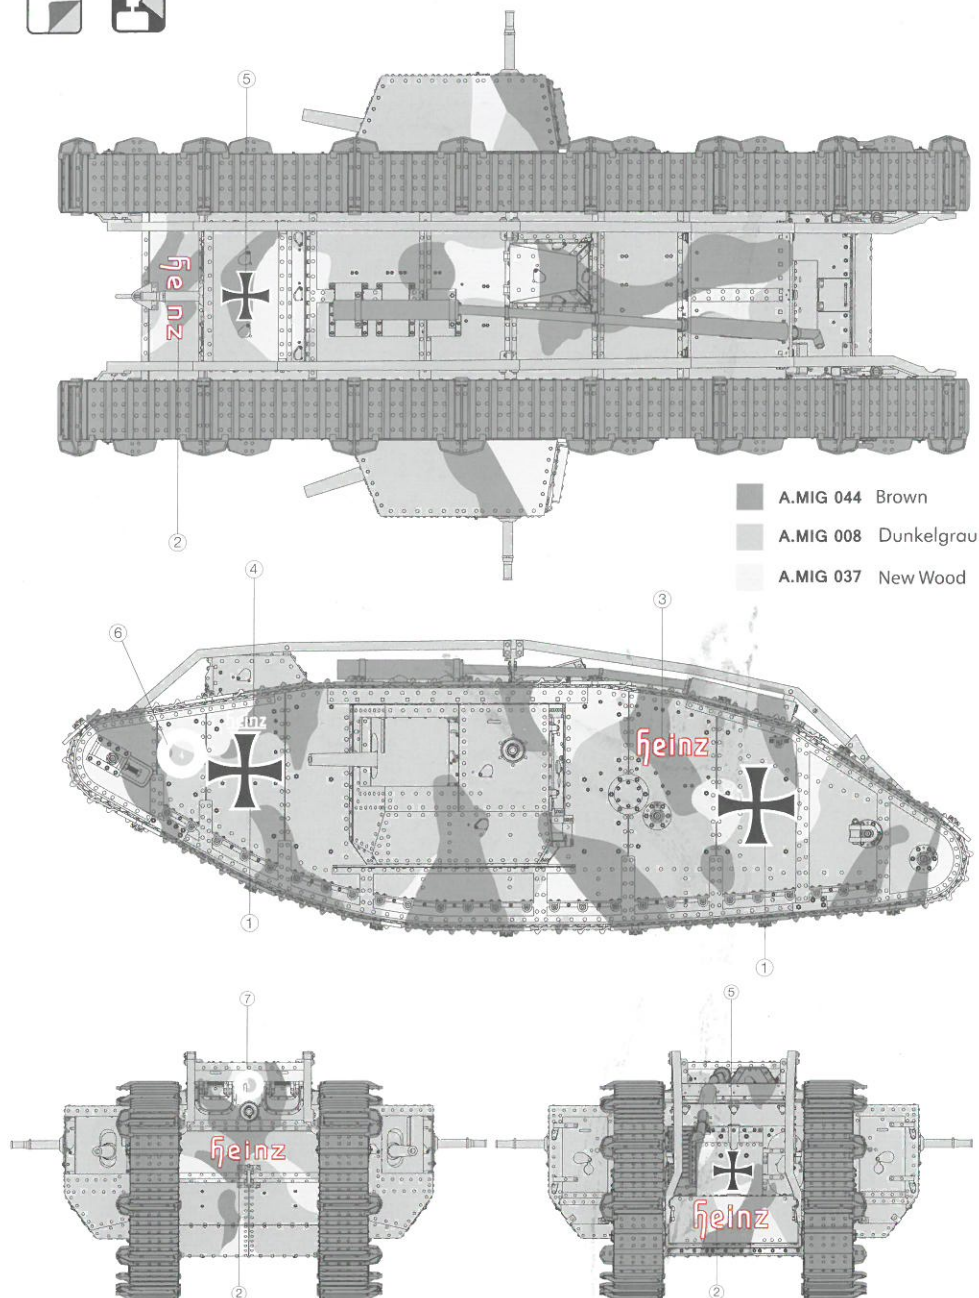

The Mark IV could probably be described as the first Main Battle Tank. Some 1,200 were built and they participated in virtually every British battle on the Western Front from the early summer of 1917 until the very end of the war, plus one action in the Middle East.

Apart from its mass production, the Mark IV was also the first tank to be built based upon experience with earlier tanks and the first to be used in combat, in a battle actually planned around the tank. [David Fletcher, British Mark IV Tank, Osprey Publishing 2007, P3]

The Mark IV Male carried three Lewis machine guns – one in the hull front and two in the sponsons – as well as the two sponson guns (now shorter barreled QF 6 pdr 6 cwt guns). The Female had five machine guns. Two of the machine guns were operated by the gun loaders.

APPLYING DECALS

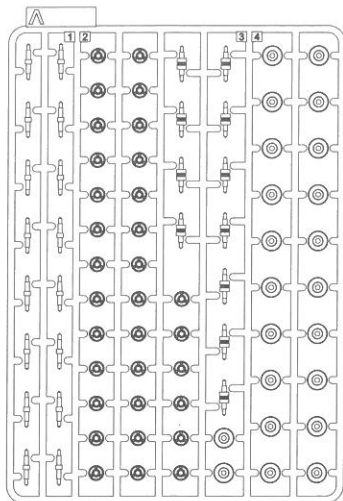

1. Clean the model surface with a wet cloth.
2. Cut out each decal design from sheet, and dip it in tepid water for 15~20 sec.
3. Hold the backing sheet edge and slide decal onto the model.
4. Move decal into position by wetting decal with finger.
5. Press decal gently down with a soft cloth until excess water and air bubbles are gone.
