

Mk.45 mod 4 5"/62 Naval Gun

The Mk.45 mod 4 is a fully automatic naval gun mount employed against surface (Anti-Surface Warfare - ASuW), air (Anti-Air Warfare - AAW) and land attack (Naval Surface Fire Support - NSFS) targets and is installed aboard DDG 51 and CG 47 class ships.

The MK 45 gun was developed as a lighter weight, more easily maintained replacement for the MK 42 5"/54 caliber gun mount. It is designed to engage surface and air targets and to provide naval surface fire support for expeditionary operations. The MK 45 MOD 4 gun mount upgrade includes a longer 62 caliber barrel that improves the gun's effectiveness as a land attack weapon (NSFS).

The gun mount features an automatic loader with a capacity of 20 rounds. These can be fired under automatic control, taking a little over a minute to exhaust those rounds at the maximum rate of fire of 16-20 rounds per minute. For sustained use, the gun mount is occupied by a six-person crew (gun captain, panel operator, and four ammunition loaders) below deck to keep the gun continuously supplied with ammunition.

READ BEFORE ASSEMBLY

CAUTION

- Read carefully and fully understand the instructions before commencing assembly. A supervising adult should also read the instructions if a child assembles the model.
- When assembling this kit, tools including knives used. Extra care should be taken to avoid personal injury.
- Keep out of reach of small children. Children must not be allowed to suck any part, or pull vinyl bag over their heads.

Be Careful

Optional

Do Not Cement

APPLYING DECALS

1. Clean the model surface with a wet cloth.
2. Cut out each decal design from sheet, and dip it in tepid water for 15~20 sec.
3. Hold the backing sheet edge and slide decal onto the model.
4. Move decal into position by wetting decal with finger.
5. Press decal gently down with a soft cloth until excess water and air bubbles are gone.

REMOVING PE

Be careful not to hurt when removing PE parts.

Secure using instant glue (not included).

Finish using file.
