

BERGEPANTHER

Auf. A

Assembled by Demag

The Bergpanzer Sd.Kfz. 179, or Bergpanther was a heavy armored recovery vehicle based on the chassis of the Panzer V Panther, with the first production model being the Auf. A. The Bergpanther first began its development in 1942 because of the need for a heavy tank recovery vehicle that could manage heavy German armour such as the Panther medium tanks or Tiger I heavy tanks. These generally required up to three Sd.Kfz 9 Famo half-tracks to recover them compared to the single half-track needed to tow a Panzer III or Panzer IV. This made the Panther the main contender for the new heavy armored recovery vehicle.

The main differences between the Bergpanther and the original Panther were that the Bergpanther had a 40,000 kg winch and cable system that replaced the turret, and a rear-mounted spade. For defensive armament, Bergpanthers were armed with a pintle-mounted MG 34 machine gun, and they were intended to be mounted with a 20 mm KwK 38 cannon, but these were seldom fitted. The Bergpanther had a crew of five men and was powered by the 700hp Maybach HL230 P30 V-12 petrol engine and a 7 speed forward, 1-speed reverse transmission system with a maximum speed of 55 km/h and a range of about 200 kilometers.

READ BEFORE ASSEMBLY

CAUTION

- Read carefully and fully understand the instructions before commencing assembly. A supervising adult should also read the instructions if a child assembles the model.
- When assembling this kit, tools including knives used. Extra care should be taken to avoid personal injury.
- Keep out of reach of small children. Children must not be allowed to suck any part, or pull vinyl bag over their heads.

Optional

Heating

Instant Glue for Metal

Do Not Cement

Remove

Remove

APPLYING DECALS

1. Clean the model surface with a wet cloth.
2. Cut out each decal design from sheet, and dip it in tepid water for 15–20 sec.
3. Hold the backing sheet edge and slide decal onto the model.
4. Move decal into position by wetting decal with finger.
5. Press decal gently down with a soft cloth until excess water and air bubbles are gone.

PAINTS REQUIRED
